

Proven Science, Trusted Performance.

Product catalog

2022-2023

THERABAND was created over 40 years ago by two clinicians to help patients recover safely and with confidence. Since then, **THERABAND has transformed the lives of millions for the better.** That passion is in the DNA of this storied brand. As the leader and pioneer, THERABAND is the standard that others measure themselves against; we are the original.

Our exacting levels of pull-force testing and product validation—as well as our proprietary formulas, processes and Trusted Progression™ System—were born to serve clinicians and the patients they guide. Designed and engineered in the USA, today the THERABAND brand and its portfolio lead worldwide.

Proven Science. Trusted Performance.

THERABAND is the original, the innovator and the creator of the category.

- ✓ Created by clinicians for clinicians.
- ✓ Proven science – proprietary formulas, processes, testing.
- ✓ Trusted Progression™ System.
- ✓ Confidently ensuring safe, consistent progress in patient recovery.
- ✓ Designed and engineered in the USA.
- ✓ Transformed millions of lives over 40 years.

THERABAND is the originator and creator of the Trusted Progression System. It is far more than colors, it is an exacting color-coded system of resistance levels that are pull-force tested and validated at THERABAND manufacturing facilities to ensure band integrity. We stand alone in providing the clinician confidence to help their patients progress in their recovery.

Learn more about the Trusted Progression System on page 9.

Resistance level	Recommended exercise level/ activity/intensity
	Easy intensity Light rehab/flexibility
	Low intensity Medium rehab/ beginner fitness/ light conditioning
	Moderate intensity Intermediate rehab/ everyday fitness/ moderate conditioning & Fitness
	Hard intensity Advanced rehab/strength training/sports & fitness
	Heavy intensity Strength training/ sports rehab/ heavy fitness
	Variable & adjustable intensity Multiple fitness levels/ comprehensive strength training & conditioning

ONE SYSTEM TWO OPTIONS UNLIMITED POTENTIAL

We broke the norm with the revolutionary THERABAND CLX, non-latex resistance bands with built-in loops that do the work of bands, loops, and handles. Now the most trusted brand of rehab and exercise tools brings you the compact and sturdy CLX Station for your clinic, and a versatile Anchor for patient use anywhere. One system now gives you and your patients unlimited versatility to customize setups for rehab and more intense strength building exercises like never before.

CLX™ Bands + CLX™ Training Station

Meet the new THERABAND® CLX™ Training Station

The THERABAND® CLX™ system – including a wall station, anchor, and a full range of CLX resistance bands, now provides unlimited versatility. With just one system you get unlimited potential for your clinic, training room, and at-home exercise programs.

THERABAND CLX Station

- ▶ Use the full progression of THERABAND CLX resistance levels
- ▶ 3 sturdy, adjustable anchor points for upper and lower body exercises
- ▶ 84-inch track with prescription markers for exact anchor placement, easy patient set up and charting

CLX Station Anchors (3 Included)

- ▶ Soft cradle keeps CLX in place while reducing wear and friction
- ▶ Woven design provides stable and lightweight security

CLX Wall Station*
Includes a full set of pre-cut THERABAND® CLX™, Yellow through Gold, 3 CLX™ Station Anchors, an accessory rack and a full-color poster with illustrations for patient learning.

N.Am. 13465 **Int./EU** 14014

CLX™ Bands + CLX™ Anchor

Meet the new THERABAND® CLX™ Anchor

An essential accessory to any self-managed exercise or rehabilitation program, the new THERABAND CLX Anchor enables you to quickly and securely attach any THERABAND CLX to stable objects such as a door frame, fixed post, or hospital bed. The new soft cradle accommodates all THERABAND CLX color progressions, and the anchor easily transitions between wrapped or slotted configurations for maximum versatility to complete your prescribed rehabilitation or strength training regimens anytime, anyway, anywhere.

- ▶ Use it anywhere - in doors and around sturdy objects
- ▶ Mimic in-clinic exercises and increase patient compliance
- ▶ Soft cradle keeps CLX in place while reducing wear and friction
- ▶ Woven design and sturdy hook and loop provide stable and lightweight security

CLX Anchor

- Anchor attaches quickly and securely to any stable object
- Soft cradle accommodates all CLX color progressions
- Conveniently allows rehabilitation and strength-building exercises to continue
- Replicate full range of clinic exercises and movements almost anywhere
- Lightweight & portable

CONSECUTIVE LOOPS

Innovation = THERABAND® CLX™

- Performance Health has designed and created the next innovation of elastic resistance products, THERABAND CLX
 - CLX - Consecutive Loops are Non-Latex* delivering versatility and ease of use.
 - THERABAND CLX Easy Grip Loops™ completely eliminates the need to ever tie knots again.
 - CLX provides multiple unique grip options and exercise possibilities like open and closed hand motions
 - CLX allows for holding sport specific objects during resistance training, and even “no grip required” exercises.
 - Designed, created and manufactured in Akron, Ohio USA
- *Not made with natural rubber latex

VERSATILE X SIMPLE X EFFECTIVE

New design of performance

- **4 PRODUCTS IN ONE** band, loop, tubing with handles & anchor
- Durable **NON-LATEX**** construction

Easy grip loops provide multiple unique grip options

New THERABAND® High Resistance Bands

Bands are designed to improve your sports performance, elevate your fitness and increase your strength. Backed by over 40 years of professional use, THERABAND continues to be the brand most trusted by clinicians, professional athletes, and everyday fitness enthusiasts.

- Made from highly durable, natural latex* rubber
- Four multiple band bundles
- Imprinted with visual resistance indicator to confirm proper stretch
- Ideal for assisted pull-ups, power lifting, Pilates, targeted stretching and toning exercises and full-body workouts
- Perfect for adding tension to common exercises like push-up and dips

(*) Estimated resistance levels are based on pull forces to stretch band between 100% and 200% elongation

Includes multi-lingual instructional insert.

*This product contains dry natural rubber.

TRUSTED PROGRESSION™ SYSTEM

Elastic resistance force and torque

Elastic resistance is a unique type of resistance training compared to other traditional forms, such as isotonic or isokinetic resistances. **The resistance provided by elastic bands or tubing is based on the amount that the band or tubing is stretched.** This resistance can be measured in pounds/kilograms of force depending on the percentage the band or tubing is stretched from its resting length; this is known as force-elongation.

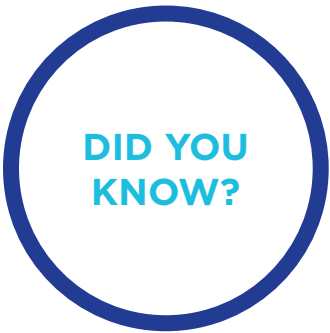

Color	Resistance at 100% elongation	Resistance increase
Gold	Max	14.2 lbs 6.5 kg
Silver	Super heavy	10.2 lbs 4.6 kg
Black	Special heavy	7.3 lbs 3.3 kg
Blue	Extra heavy	5.8 lbs 2.6 kg
Green	Heavy	4.6 lbs 2.1 kg
Red	Medium	3.7 lbs 1.7 kg
Yellow	Thin	3 lbs 1.3 kg
Tan	Extra thin	2.4 lbs 1.1 kg

Regardless of how long the band or tubing is before it's stretched, the force produced at its stretched length depends on the percent elongation. **For example, an initial 2-foot (60 cm) length of green band that is stretched to 4 feet (120 cm, double its resting length), is at 100% elongation.** Therefore, the resistance of the band is 4.6 pounds at that elongation. Each progressive step represents a consistent pull-force increase of 25% in the clinical range (Tan through Black) and 40% in the advanced range (Silver and Gold).

✓ **Patients should progress to the next-level band when 3 sets of 10-15 repetitions are achieved.** *Refer to RISE Scale study below:

Developed by Juan Carlos Colado, PHD, University of Valencia, Valencia, Spain
1. Colado et al. 2012. *J Strength Cond Res.* 26 (11):3018-3024
2. Colado et al. 2014. *J Sports Sci Med.* 13:758

What is 100% elongation?
When a length of band is stretched to twice its original measurement, it reaches 100% elongation.

Not all products available in all markets.

PROFESSIONAL RESISTANCE BANDS*

Professional - Economical bulk rolls that facilitate cutting band length to patient requirement.

20840 Blue/Extra Heavy	20841 Blue/Extra Heavy	20842 Blue/Extra Heavy

Band Loop resistance is aligned with the resistance level of a regular band tied into a loop.
*Caution: These products contain natural rubber latex which may cause allergic reactions.

NON-LATEX** ELASTIC RESISTANCE

Non-latex** - identical performance to latex

- Many patients who react to certain proteins found in natural rubber latex must avoid latex bands.
- Unfortunately, most non-latex* elastic resistance bands do not offer the same performance as latex bands without the potential for causing a latex allergy reaction.
- THERABAND® Non-Latex* Professional Resistance Bands provide the same quality and trusted resistance progression of our natural latex bands ... they stretch like latex!
- THERABAND® Non-Latex* bands do not have a scent, powder or proteins.
- THERABAND® Non-Latex* Professional Resistance Bands match the pull forces of our latex bands, and they follow the THERABAND® color-coded System of Progressive Resistance®.

Non-Latex** Professional Resistance Bands - Economical bulk rolls that facilitate cutting band length to patient requirement.

EXCERCISE STATIONS

Ultra compact and affordable options

21910 THERABAND® Wall Station is the first compact, total body rehabilitation system designed for in-clinic strength training.

- Features the familiar colors and resistance levels of resistance tubing. Includes 30.5 cm (12") Tubing in four progressive levels.
- Multidimensional design with three planes of movement.
- Comprehensive accessory package including Exercise Handles, Extremity Straps and Head Strap.
- Two full-color exercise posters.

21900 THERABAND® Professional Exercise Station combines strength, balance and flexibility exercises into one convenient system for fitness and therapy.

- Integrates with Exercise Balls and Stability Trainers.
- Includes Resistance Tubing in three progressive levels and three lengths.
- Supplied with a 91.5 cm (36") Padded Exercise Bar, two Exercise Handles, two Assist™ Straps, and a full-color poster with 24 exercises and safety instructions.
- At approximately 6.5 kilograms (14 pounds), the base is lightweight and stackable.

The color sequence links the Station to your home exercise product recommendations.
A complete accessory kit including Resistance Tubing

Versatile In-Clinic Hub, Home Exercise Success

21915 THERABAND® Rehab & Wellness Station enables easy transitions between clinic visits and home exercise programs.

Station includes:

- Multi-dimensional wall mount system that provides three planes of movement with slide tracks, position indicators and one-hand lock down to enable easy patient set up, charting and documentation
- Portable base system with six connection points
- Trusted Resistance Tubing in four progressive levels and three lengths
- Three Pro Series SCP® Exercise Balls (Yellow, Green, Red)
- Two sets of Stability Trainers (Green, Blue)
- A complete accessory kit, including Waist Belt, Assist Straps (2), Head Strap, Exercise Bar, Extremity Straps (2), Exercise Handles (2)
- Four full-color exercise wall posters

Not all products available in all markets.

ACCESSORIES

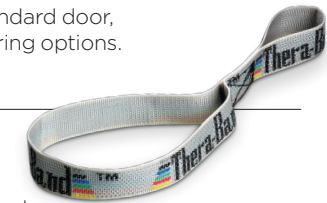

Tubing accessories

Include CE mark.

22130 Door Anchor – Used to secure bands or tubing for upper and lower body workouts. Can be secured at any point along the frame of a standard door, offering versatile anchoring options.

22010 Assist™ Strap – Increases the range of exercises that can be performed with bands and tubing. One end loops around an extremity, while the band/tubing is attached to the other end. This allows users with poor grip strength, like victims of arthritis, to use bands and tubing in training and rehab programs.

22135 Accessories Kit (Retail Display Box) – Includes a Door Anchor, an Assist Strap and two Exercise Handles.

Training station accessories

Training station accessories are compatible with the Rehab & Wellness Station, Exercise Station, Wall Station or other exercises.

Mini Ball

THERABAND® Mini Ball is soft and inflatable to support a range of varied and effective exercises designed to increase core strength in the back and abdominals. Tactile, stretchy PVC makes the yellow 23 cm (9") diameter ball responsive to the touch and non-slip when placed against a hard surface. Includes an instructional poster.

Pilates Ball

The **Pilates Balls** are universal training tools of exercise in the classic pilates school. Available in three sizes, soft and easy to handle, the balls can be used for pelvic re-education or shoulder rehabilitation. The foldable ball is easy to inflate and deflate.

Pilates Balls (EU only)			
24030	Ø 18cm	Red	
24040	Ø 22cm	Blue	
23100	Ø 26cm	Silver	

Exercise Ball Accessories

23210 Power Pump - An essential tool for achieving and maintaining proper exercise ball inflation. Most clinics use hard-to-use ball pumps. This one is easy!

23230 Exercise Ball Stackers - Set of three. Simplifies storage of inflated balls.

BALANCE PLATFORMS

One balance system for all patient needs

Have you seen the evidence lately about the effectiveness of balance boards and foam surfaces? Unstable surfaces are leading to unwavering results—reduced risk of sports-specific injuries, increased core strength, improved muscle reaction times, decreased risk of falls, improved gait and mobility, increased proprioception, and more. THERABAND® stability products, designed for people of all fitness levels, are the best solutions on the market for sports performance enhancement, balance training and rehabilitation. If your patients aren't receiving the benefits of sensorimotor and proprioceptive training, we have a simple, proven package to increase your breadth and effectiveness. We've put together the exercises, the products and the protocols you need. Our complete line of stability products follows the System of Trusted Progressive Exercise, enabling you to help patients advance effectively through different levels. We make effective balance training simple. balance products include both soft stability tools (Stability Trainers and Stability Disc) and rigid stability tools (Rocker Board and Wobble Board). Their durable, lightweight construction makes all of these products user-friendly, but their benefits extend much deeper than the surface. Includes CE Mark.

THERABAND® Stability Trainers are oval-shaped, color-coded pads supplied in three densities to provide a progressive system of balance training for rehab, post-rehab conditioning and fitness applications. The Green (Firm, Beginner) and Blue (Soft, Intermediate) pads are molded in closed-cell foam with a ridged surface. The Black (Extra-Soft, Advanced) PVC pad is inflated with air and has rounded points that provide tactile stimulation on one side. The Black Stability Trainer has sturdy edges that help prevent ankle-roll—a differentiator in the air-filled balance product marketplace.

THERABAND®
System of Progressive Exercise

Beginner Advanced
The original system of progressive exercise

Stability Trainer
N.Am./Int./EU

23305	Beginner	Green, firm
23304	Intermediate	Blue, soft
23307	Beginner	Green, firm (Set of 2)
23306	Intermediate	Blue, Soft (Set of 2)
23323	Advanced	Black, extra-soft

THERABAND® Rocker and Wobble Boards comprise the rigid stability line and embody the higher end of the system of progressive balance training. Unlike many competitors' products, they are durable and lightweight. Made of molded plastic, the square Rocker Board and round Wobble Board also offer security and versatility in the form of an anti-slip bottom and a textured top for additional proprioceptive input.

23300	Rocker Board	Black, challenging
23301	Wobble Board	Black, very challenging

The **THERABAND® Stability Disc** is more challenging than the THERABAND® Stability Trainers. The 33 cm (13") diameter disc offers an unstable, sensory-stimulating surface designed to facilitate balance and proprioceptive training, as well as automatic postural reactions. The Stability Disc is also ideal for active sitting.

23303	Stability Disc	Silver,
Active Sitting/Advanced Sports Training		

THERABAND® Dynamic Ball Cushions are usable as a balance trainer, dynamic seat cushion or universal trainings tool. The XL-Version offers various training opportunities in all body positions. Dynamic Ball Cushions offer an unstable and sensory stimulating surface designed to facilitate balance and proprioceptive training.

STRETCH STRAP

Patent-pending "comfort stretch" design increases patient range of motion

- The Stretch Strap's elastic design enables a highly effective contract-relax stretch, while the product's slight "give" supports a more comfortable static stretch.
- This functional dual purpose negates the need for static-only stretching straps.
- The Stretch Strap's numbered, multi-loop design helps users comfortably stretch their major muscle groups as well as their extremities and specific connective tissues such as the plantar fascia.

Premium

Our premium products, relationships and experience are what the world has come to expect from the leader and originator. Our exacting quality standards, customer experience and value to the clinician and patient are uncompromised and unmatched. THERABAND is Proven Science, Trusted Performance.

Confidence

Clinicians worldwide have been trained on THERABAND and place confidence in our brand. Our scientific research conducted, rigorous product testing and dedication to the clinician ensure that, every step of the way, you can trust THERABAND.

Leader

THERABAND is the original, the innovator and the creator of the category. THERABAND continues to set the standard of excellence. Our proprietary formulas, processes, testing and Trusted Progression™ System were born from that leadership.

Proven science

THERABAND is the leader with science on its side. THERABAND has been tested, validated, studied and researched to ensure superior patient safety and recovery. We control the aspects of production, from formulation to supply chain. THERABAND products comply with FDA and EU Class I Medical Device requirements.

Transformational

THERABAND was created to improve the lives of the clinician as well as the patient. THERABAND products and our Trusted Progression™ System have positively transformed the lives of millions worldwide.
